Commit : “pita: integrasi api ke halaman detail produk”

Import semua kebutuhan. Termasuk api yang dibuat sebelumnya.

```
1 import { Button } from "flowbite-react";
2 import Link from "next/link";
3 import { useParams } from "next/navigation";
4 import { useEffect, useState } from "react";
5 import { getProductBySlug } from "@app/api/products";
```

Lalu buat interface untuk data Product agar data yang diterima sesuai.

```
1 interface Product {
2   id: number;
3   name: string;
4   slug: string;
5   price: number;
6   description: string;
7   image: string;
8   whatsapp: string;
9   createdAt: Date;
10  category: {
11    id: number;
12    name: string;
13    slug: string;
14  };
15  categoryId: number;
16 }
```

Ambil slug di parameter. Buat state untuk menampung data juga. Lalu buat fungsi untuk fetching data produknya. Tidak lupa juga fungsi untuk formatting harga ke IDR.

```
1
2 const { slug } = useParams();
3 const [product, setProduct] = useState<Product | null>(null);
4
5 const fetchProduct = async () => {
6   const product = await getProductBySlug(String(slug));
7   setProduct(product);
8 }
9
10 useEffect(() => {
11   fetchProduct();
12 }, []);
13
14 function formatRupiah(angka: number): string {
15   if (isNaN(angka)) {
16     return '';
17   }
18   return 'Rp ' + angka.toLocaleString('id-ID');
19 }
```

Implementasikan data pada tampilan detail produk.

```
1
2 <div>
3   {product ? (
4     <section className="py-4 md:py-6 antialiased">
5       <div className="max-w-screen-xl mx-auto">
